

## Gastrointestinal Health and Food Sensitivities:

Formulated with purified amino acids to support dermatological and gastrointestinal health in dogs with adverse food reactions

Low-allergen carbohydrate sources to help minimize the risk of an allergic reaction

Highly digestible to promote optimal nutrient absorption

Limited fat to aid digestion for dogs with compromised gastrointestinal tracts

Post-manufacturing testing conducted to ensure trace levels of intact proteins do not exceed 0.1%

<sup>†</sup>Based on digestion testing conducted at the Purina PetCare Technology Centers

<sup>1</sup> Adjustments must be made for environmental conditions, activity level, body condition and breed size. As reflected in the feeding tables, smaller breed dogs can require 15% to 25% more kilocalories per pound of body weight than larger breed dogs. Provide fresh water in a clean container daily.

<sup>2</sup> Kilocalories of metabolizable energy (ME)

<sup>3</sup> This daily amount should be divided into several small meals throughout the day.

<sup>4</sup> For each additional 10 lbs of body weight, feed an additional 114 kilocalories.
